INTRODUCTION

This book is the third of four bibliographies on the higher vertebrates of British Columbia. Ornithology (Volume I) and herpetology have been completed (see Campbell et al. 1979, 1982); with this book the two-volume ornithology series is complete. The mammalogy bibliography remains to be done.

With this volume, 4,635 references have been assembled for the 439 species of birds known to occur in British Columbia (see Campbell 1984). In addition, thanks to increased support by federal and provincial government agencies, this volume includes a species/subject index.

Copies of all references are on file in the Royal British Columbia Museum in Victoria. We encourage use of these documents at the museum, but under no circumstances will copies be sent out.

ORGANIZATION

This book is organized in three major categories, each of which requires some clarification.

1. Master List of Citations - all references are first listed alphabetically by senior author(s), and then chronologically. For example a complex sequence might read:

Green, G.W. 1942...
Green, G.W. 1944...
Green, G.W. and L.A. May. 1941...
Green, G.W. and R.L. Todd. 1940...
Green, George W. 1951...
Green, George W. 1959...
Green, George W. and L.A. May. 1949...
Green, George W. and H.F. Price. 1950...
Green, George William. 1938...
Green, William. 1968...
Green, William. 1971...

The master number, continuing from the first volume of the ornithology bibliography, starts with 2101. For easier reading, the titles of all references are typed in upper case while each source is underlined.

2. Species/Subject Index - all species are listed alphabetically by their standard common name followed by the scientific name. Nomenclature follows the "Check-list of North American Birds" (American Ornithologists' Union 1983) and recent recommended changes (see A.O.U. 1984). These changes affect the common and/or scientific name for 70 species occurring in British Columbia (see Campbell 1983).

Species authorities are not listed. References are combined for sapsuckers ("Yellow-bellied" and "Red-breasted"), flickers ("Yellow-shafted" and "Red-shafted" = Northern Flicker), "Myrtle" and "Audubon's" Warbler (= Yellow-rumped Warbler) and juncos ("Oregon", "Slate-colored" and "Gray-headed" = Dark-eyed Junco). References with outdated nomenclature are listed under the current species name (e.g. Syrnium occidentalis (Spotted Owl) becomes Strix occidentalis).

The subject index consists of 77 categories for 2,535 bibliographic citations. Most subject headings are self explanatory; those that need further clarification are listed below.

Atlas Progress Reports - quarterly reports which summarize significant records of higher vertebrates in British Columbia along with progress made on the vertebrate atlases project co-ordinated by the Royal British Columbia Museum.

British Columbia Nest Records Scheme - annual reports which summarize breeding information for birds in the province recorded by naturalists in an organized manner.

Economics - how the habits of a particular species affects the interests of man (e.g. feeding habits which result in crop damage).

Environmental Disturbances - deals only with natural environmental changes which in some way affect a bird's habits and habitats.

Human Interactions - are either the direct or indirect actions of man which in some way have a negative effect on a bird's or a species well-being. For example logging practices which cause habitat disruptions, mortality due to road kills and hits on lighthouses, electrical wires and windows.

Nests/Nesting - includes specific information on nesting (not included in the British Columbia Nest Records Scheme) including nesting sites, habitat, material, and dates and more general remarks on nesting (e.g. sighting of a female with a brood).

Predators - deals only with information on predators.

3. Geographic Index - all citations are cross-referenced by locality using the National Topographic Grid system, which divides British Columbia into 89 major grids (1° latitude by 2° longitude). Master reference numbers are listed under appropriate grids. These grids are then listed in numerical/alphabetical order (i.e. Map Grid 82E, Map Grid 82F, Map Grid 82G, etc.). Many articles, however, contain information for much larger, ill-defined or general areas of British Columbia. Therefore, five additional categories are included:

a) British Columbia General
   - general references to British Columbia

b) Northern Interior British Columbia
   - north of latitude 55°

c) Southern Interior British Columbia
   - south of latitude 55°

d) Coastal British Columbia
   - area west of the line drawn along the summit of the Coast Mountains

e) Pelagic British Columbia
   - off-shore to 200 miles

Each of these categories should be searched in addition to the grids.

BIBLIOGRAPHIC SOURCES

This volume includes articles from 635 sources. Some are sources updated since 1977 (see Volume 1) but most are new sources. It is important to note that if a single paper concerning British Columbia ornithology was found in a particular source,all available issues of that source were searched for additional articles. Also searched were unpublished reports in the files of the British Columbia Fish and Wildlife Branch, provincial government offices in Victoria including Parks Branch, Forests and Provincial Museum, and regional offices of the Canadian Wildlife Service, including British Columbia, Alberta, Ontario and Yukon Territories.

Although most references refer directly to British Columbia ornithology,major North American bibliographies are included for select species (e.g. BALD EAGLE - see Lincer et al. 1979; GOLDEN EAGLE - see Clark et al. 1978), and groups of birds (e.g. NON-GAME BIRDS - see Trimble 1975; WATERBIRDS - see Handel et al. 1981). In addition,species bibliographies for Alaska, Yukon Territory, Alberta, and Washington State are included since they offer researchers direct access to major references outside the scope of this bibliography.

In the source list which follows,the article "The" has been dropped. For example The Ring becomes Ring. Sources marked with an asterisk (*), indicate the literature search is complete from the first issue (including those listed in the first bibliography), through the latest issue (usually 1983) available to us.

ACKNOWLEDGEMENTS

The co-operation and assistance of many organizations and individuals have contributed greatly to this volume. They include, in alphabetical order: British Columbia Ministry of Environment, Fish and Wildlife Branch (Tom Burgess, Ken Child, Myke Chutter, Rick Davies, Ray Demarchi, Don Eastman, Ray Halliday, Doug Janz, Dave Low, Rick Marshall, Bill Munro, Brian Petrar, Ralph Ritcey, Andy Stewart, Gary Tipper, Ben Van Drimmelin, Bill Warkentin, Douglas Wilson); British Columbia Ministry of Forests, Research Branch (Rick Ellis); British Columbia Ministry of Lands, Parks and Housing, Ecological Reserves Unit, and Parks and Outdoor Recreation Division (Bristol Foster, Grant Hazelwood, Peggy McIntosh, and David Stirling); Ducks Unlimited Canada (Ed Hennan, Tom Sterling, and Ken Summers); Employment and Immigration Canada Employment Development Branch (Alistair Bell, Doug Bertram, Julie Beynon, Valerie Brown, Alice Cassidy, Sharon Chapman, James Currie, Barry Forer, Kim Gage, Mark Griffin, Shannon Hackett, Jennifer Hocking, Robin Hood, Tracey Hooper, Ron Parsons and Jeff Reeve); Environment Canada, Canadian Wildlife Service (Gary Kaiser, Moira Lemon, Laszlo Retfalvi, and Michael Rodway); Malaspina College (David Kerridge); National Museum of Canada (Earl Godfrey and Henri Ouellet); Parks Canada (Barry Campbell, Larry Halverson, Bill McIntyre and John Woods); Simon Fraser University, Department of Biological Sciences (Alton Harestad, Brian Hartwick and Nicolaas Verbeek); University of Alaska, Cooperative Park Studies Unit (Fred Dean): University of Alberta, Department of Zoology (Fred Zwickel); University of British Columbia, Department of Zoology (Richard Cannings, G. Scudder, and Jamie Smith); University of British Columbia, Faculty of Forestry (Fred Bunnell, and Margaret Logan); University of British Columbia libraries (Anna Leith and Kathy Neill); University of Victoria, Department of Biology (Patrick Gregory and John McInerny); and University of Washington libraries (Nancy Blase, and Martin Dermody).

Other individuals have provided source literature or have assisted with various other aspects of the book such as cross-referencing, layout or organization. They include Gary Anweiler, Rick Bonar, Don Blood, Eileen Campbell, Rob Cannings, Harry Carter, Gary Davidson, Bill Duncan, Heather Garrioch, Brian Goodacre, David Hatler, Tom Reimchen, Spencer Sealy, Gary Searing, Christopher Shepard, Michael Shepard, Christopher Siddle, Elizabeth Taylor, Brigitta M. Van Der Raay, Mary Wainwright, Scott Webb and Wayne Weber.

Keith Taylor and Brigitta M. Van Der Raay provided all artwork except for the cover which was designed by the Display Division of the British Columbia Provincial Museum. The map was drawn by Elizabeth Taylor. Parts of the manuscript were typed by Erica Bates and Legislative Support Services. Computer processing and printout of the species/subject and geographic indicies were done by Karen E. Dawe. The camera-ready copy was prepared with the assistance of John D. McIntosh.

This project was supported, in part, by Employment and Immigration Canada, Employment Development Branch; Environment Canada, Canadian Wildlife Service, Pacific and Yukon Region; Ministry of Environment, Fish and Wildlife Braonch; British Columbia Ministry of Lands, Parks and Housing, Parks and Outdoor Recreation Division; British Columbia Ministry of Forests, Research Division and Parks Canada, Western Region.

We are grateful to them all.
